RE: This bag contains empty and clean camping fuel tank/bottle(s). NO fuel vapors

Dear TSA,

As per the requirements stated on the TSA website, the fuel tank/bottle(s) have been emptied, cleaned, and dried. There are no fuel vapors.

The cap to the tank/bottle(s) has been purposely removed to allow this to be easily demonstrated for your safety inspection.

Thank you for helping me ensure that all of my gear reaches my destination.
