

Camping

Traveling with Special Items

Outdoor enthusiasts should prepare and pack carefully so that they don't have to surrender items at the security checkpoint or have them removed from their checked baggage.

Below is information specific to camping and outdoor activities:

Camp Stoves - These can travel as carry-on or checked luggage only if they are empty of all fuel and cleaned so that there are no vapors or residue left. Simply emptying the fuel container will leave flammable vapors. We recommend that you ship the fuel containers to your destination ahead of time - passengers frequently have to leave them at the checkpoint because of fuel vapors.
